# Why is this Program Needed for Children?

A new and unique educational program is needed to reach children and encourage healthy behaviors as early as possible.

## Obesity:

- ▼ 16% of children (over 9 million 6-19 years olds) are overweight or obese

## Cardiovascular Disease:

\*In a population-based sample

- ▼ Approximately 60% of obese children aged 5 to 10 years had at least one cardiovascular disease risk factor
- ▼ 25% had two or more risk factors

## Diabetes:

\*For children born in the United States in 2000

- ▼ 30% of boys and 40% of girls are at risk of being diagnosed with Type 2 diabetes at some point in their lives

The CDC reports that school-based health education programs that encourage healthy behaviors are the most effective method of combating cardiovascular illnesses and can reduce the prevalence of obesity by 50% among elementary school children.
